### REMARKS/ARGUMENTS

#### Status of the Claims

Claims 1 - 75 are currently pending in the above-identified application. Claims 6-12 and 56-62 have been amended to particularly point out and distinctly claim the subject matter which Applicants regard as the invention.

#### Rejections under 35 U.S.C. § 112

The Examiner has rejected claims 6-12 and 56-62 under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which Applicants regard as the invention.

Claims 6-12 and 56-62 have been amended to recite "the oxygenate conversion zone" in place of "the oxygenate removal zone." As can be understood from the specification, the terms are interchangeable and Applicants have amended the claims to particularly point out and distinctly claim the subject matter which they regard as the invention. Applicants respectfully request withdrawal of this rejection and allowance of the claims.

#### Rejections under 35 U.S.C. § 103

The Examiner has rejected claims 1-75 under 35 U.S.C. § 103(a) as being obvious over U.S. Patent No. 6,657,022, which is prior art only under 35 U.S.C. § 102(e). Under MPEP § 706.02(l)(2), Applicants state that Application 10/712,953 and U.S. Patent No. 6,657,022 were, at the time the invention of Application 10/712,953 was made, subject to an obligation of assignment to ExxonMobil Chemical Patents Inc. Therefore, U.S. Patent No. 6,657,022 is removed as a prior art reference under 35 U.S.C. § 103(a), and Applicants respectfully request withdrawal of this rejection and allowance of the claims.
